Canine Spay or Neuter Package		

Prevention is the key to better health

Preventative care can help set the foundation for a lifetime of good health, so you and your puppy can spend more quality years together. It’s essential for detecting diseases early on, before they become more serious—and more expensive.

Growing bones need special care

Puppies seem to get bigger right before our eyes. Such rapid growth can come with its own set of problems. No matter what their breed, puppies need to be examined frequently in order to make sure their growth and development is on the right track.
